### **Leeway/Haiti Connection –Think our icy roads were bad??**

Last November, two of Leeway's staff members traveled this "road" for six hours from the airport in Port Au Prince, Haiti, to a primary care site and make-shift cholera clinic in Gros Morne.

Janet Constantino, APRN and Joan Stewart, RN and Certified Wound Care Specialist, spent 10 days donating their hearts, skills and expertise in a relief effort to the people of Haiti. As part of the Global Health Ministry health care program, Janet and Joan brought medical supplies donated by Leeway staff, friends and associates. Nelson Ambulance, Discover Pharmacy, McKesson Medical- Surgical, Total Care Home Care & Nursing Services and People's Pharmacy all contributed money and/or supplies. Leeway staff contributed medical supplies and items for the children of Haiti to enjoy.

This was Janet's second trip to Haiti, having joined Global Health Ministry's trip in Nov. 2009 as well. She says "The Haitian people suffer a great deal, but they are happy, welcoming people." Joan was inspired to join Janet and says "...I knew that some of what I would see would be heart wrenching...but I felt an intense need to be there to help..." They returned with some images to share ...and some they keep to themselves. Leeway's Executive Director, Heather Aaron, says "we are honored by the opportunity to share our expertise...our love of healing and caring for others."

Both Janet & Joan are planning to return again next year and have recruited colleague Liz Sheehy, RN to apply as well.
